

Ufficio Missionario

Rome, July 21st, 2018

To the applicant

The Ufficio Missionario of the Daughters of the Church was created in 2011 to support and help social care organizations all around the world.

We gladly support the MOB Rural Health Centre of Mandya (Karnataka. India) because we know their merit and need: since 1992 they have been working with endless dedication and love, gaining remarkable competence and vast experience.

They host social tutoring programs to help people becoming aware of their rights and organize themselves in groups for mutual help, the more prominent of which are: the Leprosy eradication and the HIV/AIDS Awareness Programme; Women Empowerment; Community Based Rehabilitation (CBR) for the disabled; Awareness programmes in villages, schools, colleges and many others.

Aside from these programs, they pursue a life of service, taking care of sick children with no family support, ensuring them dignity, education and an overall better quality of life.

We confidently and willingly submit this project to anyone with the possibility and desire to support it, wishing to have success to every initiative they take for human cause.

with best regards,

Maria Giampiccolo
Ufficio missionario
