LETTER OF APPRECIATION

Dream India Network is a Bangalore based Civil Society Organisation that works to bring about social transformation through the empowerment of the most vulnerable section of society. Our three main focusses are child care, care of the elderly destitute and the abandoned – and empowering a network of voluntary organisations for greater efficacy. Typically, we carry out our mission in partnership with other not-for-profit organisations that share our dream for a better world.

While we have known MOB Rural Health Centre, Mandya for several years for their admirable work in the social sector, our direct engagement with them commenced 2 years ago when we collaborated with them to set up a project in Mandya for the care and rehabilitation of those abandoned on the streets. Under the terms of engagement, we support them with funding and mentoring.

Our experience in working with MOB Rural Health Centre has been very gratifying so far. We are very taken up with their commitment and passion to serve the most disadvantaged of our society. We also have to acknowledge their best-in-class standards of professionalism, integrity and governance. We will be happy to look at every opportunity to enhance the scale of our collaboration with them.

For Dream India Network
P.V.Mathew
Chief Executive Officer
